

**HARNESSING THE POWER  
OF THE MICROBIOME  
TO IMPROVE ANIMAL  
HEALTH AND NUTRITION**

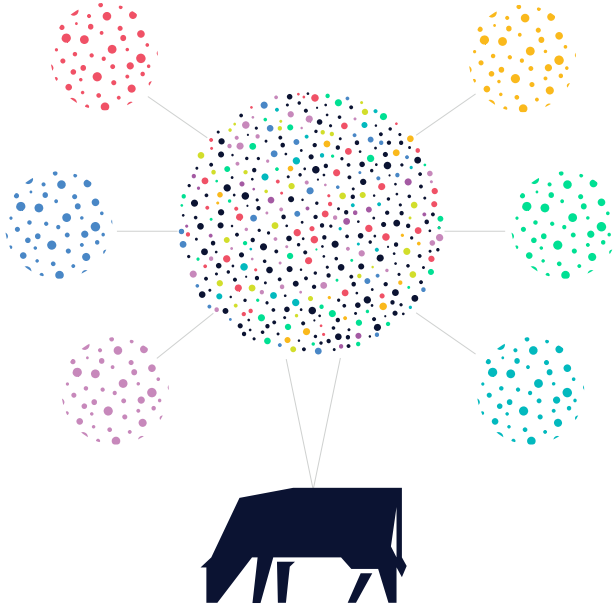

# WE ARE REVOLUTIONIZING ANIMAL HEALTH AND NUTRITION

At Native, we're inspired by what happens in nature, and are continuously studying the highest-performing and healthiest animals in the world to discover what sets them apart.

## USING THE BEST OF NATURE, FOR THE GREATER GOOD

Our advanced technology platform has enabled us to crack the code of the animal microbiome, and provides us with a deep understanding of the effect it has on animal health and nutrition.

This has led to the development of the next generation of microbial feed supplements — to improve the health, productivity and sustainability of animals with microbes that are native to them.

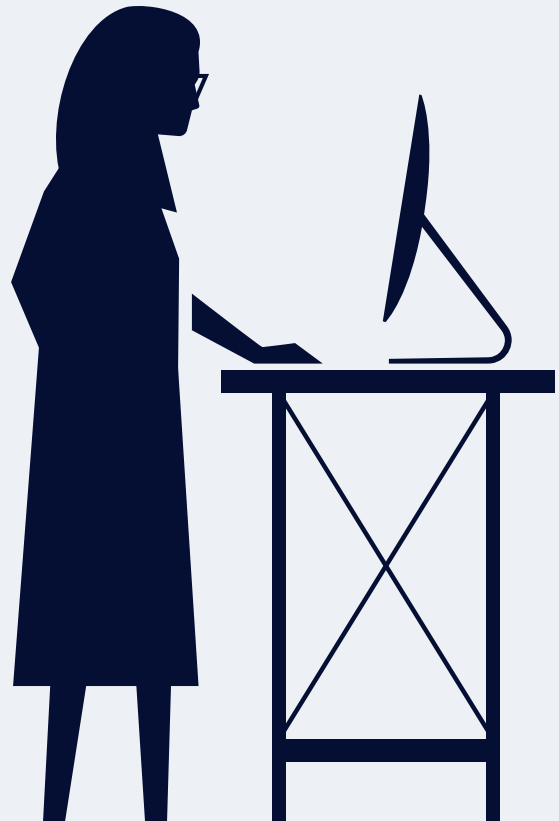

## NOT LONG AGO, NATIVE SET OUT ON A PATH OF DISCOVERY ...

**In 2015, a group of scientists from outside the traditional Animal Health and Nutrition industry set out on a path of discovery to better understand what natural microbial processes are at work in animals. Starting with the customer in mind and a “think differently, act differently” mindset, Native began working to pioneer the emerging field of endomicrobial ecology.**

Today, the company is harnessing new genomic technologies and methods of its own creation to realize the goal of improving animal nutrition and well-being from the inside out.

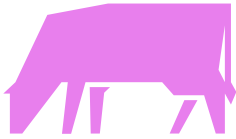

Pursuing this leading edge of science, Native has created a new category of live, all-natural endomicrobial products.

Look to Native for products that improve the safety, sustainability, and performance of our world’s animals.

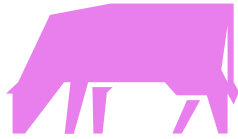

# OUR MISSION: TO IMPROVE THE HEALTH, SUSTAINABILITY, AND PERFORMANCE OF ALL ANIMALS

## NOW AVAILABLE

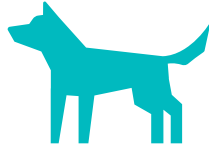

**GALAXIS FRONTIER**  
Dairy

**GALAXIS**  
Dairy

**AVIUS PROTECT**  
Poultry

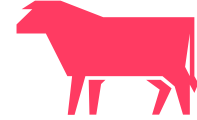

**ARKUS**  
Canine

## IN DEVELOPMENT

**AVIUS PERFORM**  
Poultry

**MAGNIUS**  
Beef

**ASCENIA**  
Equine

**SWINE**

**AQUA**
